Wireless Long Range Video Solar Powered Surveillance Systems

This range of solar powered surveillance solutions has been developed by RhinoCo Technology to meet the increasing demand for remote surveillance where cabling for both video and power is impossible or cost prohibitive. These systems provide a fully self sufficient wireless surveillance solution, which can be customised to your individual requirements. There are three versions available depending on your individual needs:

- 1. Analogue System - For local Point to Point CCTV Surveillance**
Sends high quality real-time encrypted digitised video and audio up to 5km (LOS). Connect to composite video input on any DVR.
- 2. IP Camera with Wireless Access Point (802.11G)**
Designed to integrate with an existing WLAN. Sends high quality real-time encrypted digitised video and audio using an outdoor WAP.
- 3. IP Camera with Wireless 3G Modem**
Sends high quality MPEG4 real-time encrypted digitised video and audio over a 3G mobile network. Allows you to locate your camera virtually anywhere. Ideal for remote location, rapid deployment applications and event security.

Incl. 5.8m galvanized steel pole with in-built 120 watt solar panel & 150Ah deep cycle lead acid battery (charged by solar panel).

Ideal for: remote locations, car parks, street surveillance, park lands, rapid deployment applications & event security.

'FINALLY AFFORDABLE' VEHICLE & PERSONAL TRACKING SYSTEM

Until now GPS tracking systems have been far too expensive and complex for most people to consider using with their small fleets or for personal tracking. With our latest web based RhinoTracks system you can find out the location of your loved one, staff or vehicle at anytime. Location data can be requested on demand or automatically transmitted to our secure server at variable time intervals from every 5 seconds to every 5 hours using GPRS data. Find where someone is or where they have been from anywhere with internet access.

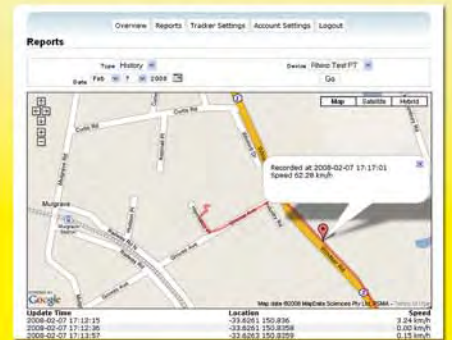

Where Are They Now?

>> Easy to Use & Install

>> Uses Google Maps*!

step 1.

Install your GPS Tracker in your vehicle with a GPRS enabled SIM card (not included)

step 2.

Go to our RhinoTracks website & login / register your account www.rhinotracks.com.au

step 3.

Select 'Live View' or 'View History'. Data includes Google Maps*, Date / Time / Speed & GPS coordinates

Rhino
Model: RHINOTRACKS-VTD

Compact GPS Vehicle Tracker

This unit is ideal for installation in all 12VDC vehicles. Installation should only take around 15mins. Simply insert your GPRS enabled SIM card and connect power to begin tracking.
